ERODEX

THE LEADING EDGE

ANTI-CORROSION POWDER

Erodex Anti-Corrosion Powder is an innovative new powder based additive that protects both workpiece and tank from oxidation. Supplied in convenient 500g packets, it is superior to anti-corrosion liquids in many ways:

Premium performance, low cost

Erodex Anti-Corrosion Powder only requires 0.1% to be added to the capacity of a tank (100g powder for 100L capacity).

Easy storage and handling

The compact, easy to handle packaging makes this product convenient for storage and significantly lighter than liquids, handling is far easier, less hazardous and even if a spillage occurs, the powder can be easily gathered.

Simple to measure

Unlike other anti-corrosion products, Erodex Anti-Corrosion Powder can be easily measured using just a measuring cup.

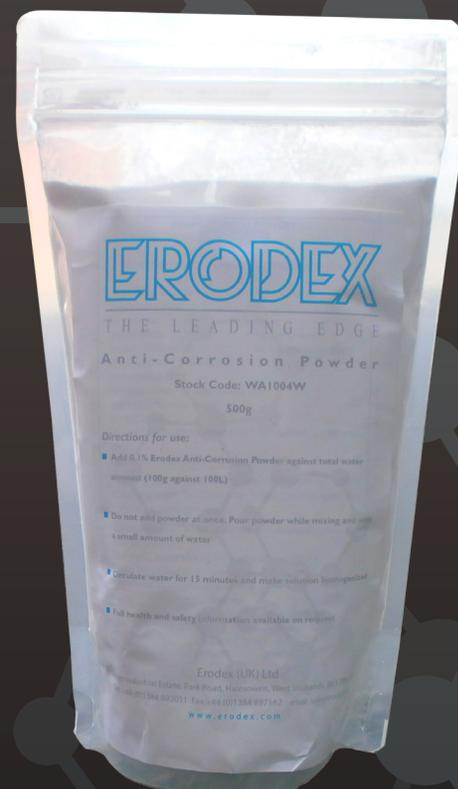

Easy to dissolve

In contrast to some powdered products, Erodex Anti-Corrosion Powder is easy to dissolve and always homogeneous.

Low Viscosity

The solution is not sticky when dried which means:

- Removing of sludge is easier, preventing secondary discharge
- Keep your machine and work station clean
- No detrimental affect on filter and ion-exchange resin
